

Drum Grab Attachment – Double

Designed to handle two steel drums at the same time (one drum can also be handled), the drum grabber can help speed up your drum handling operations due to its dual lifting capability.

Heavy duty zinc plated screw clamps ensures the drum handler is safely secured to the forks of your forklift during the entire drum lifting and transportation process

- The 'entry-level' drum grab has been designed especially for the handling of steel drums with rolling hoops.
- This drum handler is designed for handling steel oil drums, where contents have high mass to volume ratios, such as powders, metals, etc.
- 'CE' marked.
- Attaches quickly and easily to most fork trucks
