

Drum Grab Attachment – Single

The ideal 'entry level' drum handler for low to medium movement of steel drums around the factory or store.

Fully automatic in operation, the grab simply locates underneath the 'rolling hoops' of the drum and tightens its grip once lifting commences. No manual handling of drums is required, thus reducing risk of injury whilst increasing on site Health & Safety.

- The 'entry-level' drum grab has been designed especially for the handling of steel drums with rolling hoops.
- 450kg capacity (FOR STEEL DRUMS ONLY)
- Fully automatic operation.
- The simple to use automatic drum clamp has quick-slide two-position adjustment to allow handling of 210 liter steel drums with rolling hoops or 210/220 'L'
- This drum handler is designed for handling steel oil drums, where contents have high mass to volume ratios, such as powders, metals, etc.
- 'CE' marked.
- Attaches quickly and easily to most fork trucks
